## 26 Amazing Animal Moments In Contemporary Art

Cats control the Internet, and dogs are making a pretty solid resurgence in serious films. But contemporary art has long been a veritable menagerie, with animals — horses! birds! pigs! — acting as both subjects and participants. Here, we present a necessarily incomplete list of some contemporary art's more memorable animal moments.

### Hope Gangloff

This New York painter creates stunning, romantic portraits, often of her close friends, or musicians she admires. She's also a deft hand when it comes to rendering their animal companions: cats, dogs, the occasional swan. In "Moolog, Dad and Kieve," 2015, she gives us two pet roosters cozying up to her father, who refuses to have his enjoyment of a magazine... well... cock-blocked.
